

Confirmed Speakers Maritime Day, Thursday 14 May 2020

Björn Blomqvist, Rederiaktiebolaget Eckerö

Based in Mariehamn Rederi Ab Eckerö controls a cruiseship, cargo vessels and ropax. CEO Björn Blomqvist has been in charge since 2004 but is far from finished. Mr Blomqvist is a fresh voice in a sometimes quite conservative environment.

*Björn Blomqvist,
Rederiaktiebolaget Eckerö*

Christer Bruzelius, Destination Gotland

Very few has the same experience in modern shipping as Christer Bruzelius, CEO of Destination Gotland AB. Mr. Bruzelius will speak about the need of sustainability in business and how to build passenger ships in China.

*Christer Bruzelius,
Destination Gotland*

Håkan Fagerström, TallinkSilja

As Group Head of Cargo of Tallink Group Håkan Fagerström has unique insight in the daily life of a freight-giant. Mr Fagerström is prepared to share knowledge and experience in how to become market leader in the Baltic Sea.

Lasse Johansson, SMHI - Climate Change and its Effect on Shipping

Lasse Johansson is, as senior consultant at SMHI, specialized in oceanography and meteorology for applications in areas of construction, insurance and environmental assessment. He has a focus in joining statistical methods with the marine sciences to improve risk and likelihood assessments and is also pursuing projects to facilitate the communication between producers of this type of information and the receivers of it. The ongoing climate change challenges scientific thinking as well as the statistical methods available and our understanding of risk. These questions are a rapidly growing part of his day-to-day work.

Lasse Johansson, SMHI

Kjetil Kåsamoen, Senior Principal Specialist DNVGL - Optimizing operation of vessels

Kjetil Kåsamoen, Master Mariner, has experience from LNG- and general cargo ships. After his time at sea, he started in SpecTec, a software company delivering to the maritime industry. He has now worked in DNV GL for 18 years. Most of this time has been dedicated to safety management- and competence management systems.

Kjetil was also the project manager for the development of "Optimization of operation through auto-remote solutions"-standard. For several years he was DNV's representative to IACS for ILO-matters, and are still a member of the Norwegian delegation to the ILO.

Per Tunell, Wallenius Marine

Petter Mowinckel, Senior Principal Consultant DNVGL - Future Class for Ship Manager

Petter Mowinckel, Naval Architect NTH 1981, has experience from Engineering and Offshore Construction Companies, Ship Owners, Consulting and Software providers holding positions within front end engineering, quality management and sales & marketing.

Borna Petrovic, Barry Rogliano Salles

Some say it is enthusiastic brokers that make the shipping industry go round. Borna Petrovic works for one of the game changers in broking – BRS. Mr. Petrovic will enlighten your knowledge of S&P in ro-ro and general cargo ships.

Per Tunell, COO Wallenius Marine - Leading the Way towards Sustainable Shipping

Per Tunell is the COO of Wallenius Marine and is with his background as a Naval Architect deeply involved in the inventive research projects at Wallenius Marine. At the forefront of the current research projects is a concept for wind powered ships, using upright wings, reaching sailing speeds of 10 knots. These WPCCs (Wind Powered Car Carrier) with their unique hull shapes and designs are expected to reduce emissions by 90 percent compared to today's car carriers.

*Cecilia Österman,
Linnaeus University*

Cecilia Österman, Linnaeus University - Human Element in Sustainable Shipping

Cecilia Österman holds a position as Senior Lecturer in Maritime Science at Linnaeus University in Sweden, and a PhD in Shipping and Marine Technology. She has a background in marine engineering and previous work experience includes 12 years at sea in the Swedish merchant navy, and work at a naval shipyard. Cecilia's research focus is safe and socially sustainable maritime operations, designing technical and organizational systems to fit human abilities and limitations.
