

Aboa Mare

Aboa Mare Maritime Academy and Training Center is a leading maritime training, education and simulation center in Turku, Finland, founded in 1813. Aboa Mare offers degree programs, continuing education and seminars for maritime professionals. The simulation center comprises bridge simulators and technical, VTS and GMDSS simulators. Students and course participants can undertake practical exercises using the simulators, designed to replicate actual ship bridges and engine rooms. Aboa Mare also utilises its maritime expertise and simulation know-how to deliver high-quality research and development projects. Vocational education is provided through Axxell and university-level education through Novia University of Applied Sciences.

Accelleron Nordics

We are Accelleron, we help the world move forward more efficiently and sustainably. As a global leader in turbocharging, fuel injection, and digital solutions for heavy-duty applications, we support the marine and energy sectors that power modern society.

Our technologies accelerate decarbonization by delivering industry-leading energy efficiency, fuel savings, and lower emissions. Through proactive maintenance, component upgrades, and data-driven insights, we keep engines performing at their best throughout their entire lifecycle.

AEGIR-Marine

AEGIR-Marine is an OEM-independent manufacturer and service provider of stern seals and propulsion parts. With ten offices and service hubs strategically located around the world, we provide 24/7 service and support to the international shipping industry. This includes repairs, overhauls and retrofits of stern tube seals, thrusters (bow, stern and azimuth), CPPs, FPPs and stabilizers. We also manufacture our own class-approved spare parts: this enables us to act fast to minimise your downtime. Our service engineers are honest and experienced, working afloat, in-dock, in-house or even underwater to get the job done. We are a company with forward-thinking values: we work towards the increasing sustainability of the shipping industry, making ships greener for the benefit of all.

Alandia Shipping Academy

Alandica Shipping Academy unites maritime education in Åland through Ålands yrkesgymnasium, Högskolan på Åland, and ASA Safety Center. We provide a comprehensive pathway from vocational training and higher education to advanced safety courses. In close collaboration with the maritime industry, we equip students with the knowledge, skills, and experience needed for successful careers at sea.

Arc Shipyard Estonia

ASA Safety Center

ASA Safety Center is a certified training provider specializing in STCW and safety training for both maritime and land-based industries. We offer practical and theory-based courses in maritime safety, fire safety, first aid, and emergency preparedness. With experienced instructors, modern facilities, and tailor-made solutions, we help companies strengthen competence, safety awareness, and operational readiness.

AT-Marine

*Navigation and communication systems • Machine and fire alarm systems • Engine room equipment, sound and light alarms, alarm panels and centers • Engine room equipment, sound and light alarms, alarm panels and centers • Temperature and pressure sensors • Machine automation • Escape and emergency lighting including special signs for exterior and interior decks • LED lamps, searchlights and window wipers • Liquid Handling Equipment

BLRT Repair Yards

BLRT Repair Yards is a group of ship repair yards strategically located across the Baltic Sea region, with facilities in Estonia, Lithuania and Finland. The group of yards is part of BLRT Grupp, the largest industrial holding in the region, boasting a rich history and significant industrial heritage. Our mission is to ensure the seaworthiness, reliability and performance of the global fleet through comprehensive ship repair services and green solutions that help shipowners meet industry regulations and decarbonization targets.

Blueflow / DEIF

Blueflow Energy Management helps ship operators monitor, report and optimize energy use, reduce costs and improve sustainability through intelligent, data-driven solutions. DEIF provides intelligent energy control and management solutions for power generation, industry and marine applications, enabling efficient, reliable and sustainable energy systems.

Blöber

We fender pleasure craft fleets by Blöber berth fenders. As well deliver and install PU coatings onboard vessels wet rooms, hall ways, decks, tanks, ramps etc.

Bore

Bore is a trusted RoRo tonnage provider within shortsea shipping. Together with our customers, we develop efficient and reliable transport solutions.

Carus

Carus is a global provider of standard IT solutions for the maritime travel and transport industry. We design, build, and support systems critical to ferry operations and sales worldwide, covering the full 360° of the passenger journey. Our reservation system supports mobile booking, self-service check-in and boarding, digital cabin keys, and lounge access. Carus clients span the Baltic, Europe, UK, North America, Africa, and Australia, operating diverse vessels and showcasing the flexibility of our solutions.

CATA

Rauma Cata provides towage, icebreaking and fairway services for the maritime sector, as well as special services for marine rescue and offshore construction activities. We also cater project transport services.

Deltamarin

Deltamarin Group has more than 35 years of experience in providing ship design, offshore engineering and construction support services for marine and offshore industries worldwide.

DESMI

DESMI - Make life flow. From engine rooms to ballast water tanks, we supply energy-efficient pumps and systems that keep your critical processes flowing on every type of ship all over the world. DESMI is well known for products that provide trouble-free performance and low energy consumption – and for global service that keeps them running that way.

DNV

DNV (Det Norske Veritas) is a global assurance and risk management company headquartered in Høvik, Norway. Founded in 1864, it provides services across various industries, including maritime, oil and gas, renewable energy, and healthcare, aiming to safeguard life, property, and the environment.

Donsö Shipping Meet

Every other year, delegates from around the world gather on the island of Donsö, eager to discuss shipping and shipping-related topics. A unique event with shipping at heart - a meeting place for the maritime cluster. Next event DSM2027, September 6-8, 2027. Let's meet!

Duwel

DUWEL provide products of the highest quality and strive to provide an optimal solution to our customers. As our customer, we will give you a strong support throughout your project. Not only at the project start, but throughout the entire product life.

Eckerö Group

Elomatic

Elomatic Marine is a leading consulting and engineering partner for the global marine industry, specializing in complex vessel projects such as icebreakers. We help shipyards modernize operations and adopt data-driven, sustainable practices through advanced engineering, consulting, and project management services. For shipowners and operators, we provide innovative products and engineering solutions tailored to the evolving needs of the industry. With offices in Finland, Canada, Germany, Poland, and the United States, and a strong partner network, we serve customers worldwide.

ESL Shipping

Everllence

Everllence is one of the leading providers of propulsion, decarbonization and efficiency solutions for shipping, the energy economy and industry. Everllence PrimeServ is the global service brand of Everllence, delivering expert maintenance, genuine spare parts, and cutting-edge digital solutions for marine, energy, and industrial sectors.

Finferries / Axferries

Finferries is responsible for ferry, commuter ferry, and cable ferry traffic on over 50 routes in Finland. The vessels transport more than 4 million vehicles and 10 million passengers annually. Axferries is responsible for the main routes in Åland's archipelago traffic and strives to offer reliable, sustainable, and modern transport solutions for both residents and visitors in the region.

Finlands Maskinbefälsförbund

Finnish Seamen's Church

Seamen's church provides welfare and counselling services for seafarers and Finnish expatriots. Organization is founded 1875 and has a network over the whole world.

Finnish Ship's Officers'

The Finnish Ship's Officers' Union is a trade union founded in 1905 that represents deck officers in the maritime sector at sea and on land, as well as other employees in the sector.

Finnlines

Fintraffic

Fintraffic controls traffic on land, at sea and in the air. We help people and goods arrive safely and smoothly, while also taking account of the environment. Intelligent traffic control services, digital services for companies and consumers and up-to-date traffic information are at the core of our work.

Foreship by Rina

Foreship is the RINA Group company specialised in ship design and marine engineering consultancy. Founded in 2002, it supports the global shipping industry across the entire project lifecycle, from preliminary newbuild and conversion studies to complete design packages, on site support, supervision, and construction project management. Working closely with shipowners and operators, Foreship is recognised for its practical, solution driven approach and leadership in zero emission technologies, alternative fuels, energy efficiency, and decarbonisation pathways.

Furuno Finland

Furuno leads maritime electronics, renowned for pioneering technologies and unmatched excellence, setting industry standards worldwide in navigation equipment. Furuno Finland is a major navigation system provider for Åland and Finland with 46 employees in Espoo and a professional dealer network.

Garant Group

GARANT GROUP – the global service partner to maintain vessels compliant, operational, and safe.

Class approved supply of:

- machinery and other equipment repairs
- global diving support
- maintenance of safety equipment (incl. Ac/Ox System inspection)
- mooring and lifting equipment

Gard

Godby Shipping

Godby Shipping is a privately owned shipping company located in Åland Island. Our aim is to offer high class tailor made sea transportation for the forest industry and liner operators. We operate a modern and competitive fleet with eight ro-ro-vessels under Finnish and NIS flag. In total, the company employs about 200 persons.

Hatteland Technology

Hatteland Technology is a global technology partner for system integrators across a wide range of industries. We deliver tailored solutions that include monitors, panel PCs, industrial automation, network hardware, CCTV, and software.

Helmacab

Helmacab specializes in the development and production of cables for Marine, Telecom and Industrial applications. We're the Reel Deal – quality, flexibility and outstanding personal service in a one-stop-shop for all cabling needs. We have over 60 years of experience in all things cable under our belt. Having always been customer oriented and set out to be the expert in marine cabling is the reason we are known as the preferred partner for Marine cabling. From product design ingenuity and extensible cable range to custom labelling and logistics services – all under one roof. Ours.

HL-Marine

HL-Marine is a trusted partner for ship owners and shipyards. HL-Metal has long experience and can-do attitude to serve customers all around the world. We have experience on both new builds and conversion works. HL-Marine has over 10 years experience building vessels for fish farms. Besides new vessels HL-Metal provides maintenance- and conversion services for fish farms. HL-Marine builds linkspans, ramps, bollards, and gangways for vessels, trucks, cars and pedestrians.

Holmbergs

Holmbergs Ab is a family-owned engineering and service company based in Åland, established in 1963. We support the shipping, port, shipyard, construction and industrial sectors with welding, CNC machining and turning, hydraulics, steel fabrication, repairs, installations, maintenance, and mobile field services. We help customers minimize downtime and maximize operational reliability.

Högskolan på Åland

Åland University of Applied Sciences is a university located in Mariehamn, Åland. It offers bachelor's degree programs in various fields and selected master's level studies. The maritime programs provide high-quality training for future sea captains and marine engineers, combining theory with hands-on experience using simulators and ships, preparing students for global careers in the maritime sector.

If

InduShip

InduShip B.V. is specialized in OEM spare parts for the shipping and power plant industry. We are not a trading company but provide commercial support and connect companies for Marine Motor Service, KET Marine International and Marine Pump and Compressor Components (MPCC) in designated countries throughout the world.

KET Marine International

Founded in 1985, KET Marine has grown into a trusted global supplier of high-quality separator spare parts and reconditioned components for GEA Westfalia & Alfa Laval. With decades of experience and a deep understanding of separators, we provide reliable solutions, expert service, and technical support to keep vessels operating safely and efficiently worldwide.

Kongsberg Maritime

Kongsberg Maritime is a global leader in maritime technology, delivering advanced solutions for ship design, navigation, operations, and training. At this event, we showcase a broad portfolio including simulators, propulsion, handling systems, and digital services—reflecting our commitment to safe, efficient, and sustainable operations across the marine and offshore industries.

Langh Ship

Lindemann Additives

We are manufacturer of Stop Leak additives for propulsion systems (stern tubes, thrusters, CPPs, rudders, stabilizers) and hydraulic systems (cranes, hatch covers, winches, etc).

Our additives:

- reduce oil pollution
- save costs of operation
- easy to use by the crew
- highly effective against water ingress and oil loss

Lockton Marine

Lockton Marine - The specialist marine division of Lockton

We are a global team of marine experts who deliver risk solutions to every corner of the marine world. Protecting vessels, ports, people, infrastructure, cargo and so much more. With us you gain a long-term risk partner who protects your people, assets and ambitions - giving you peace of mind and the freedom to focus on your business.

What makes us different to the other insurance brokers? We are privately owned. Which means we have no shareholders or investors to answer to. Our people put their time where it matters most – you.

Machinery

We have an over 100-year-long history. We sell, install, repair and service different kinds of machines and equipment as well as technical accessories. We supply tools for construction as well as engines, transmissions and generators for different needs.

MAEM

We are an independent manufacturer of fully interchangeable alternative marine spare parts for different equipment and machinery of the vessel engine room. We specialise in fuel, oil purifiers and filtration systems. After many years in business, we have become a renowned and valued manufacturer of alternative marine spare parts worldwide. In that period of time, we supplied hundreds of thousands of various marine spare parts for thousands of all types of vessels.

From the simplest washers and seals, to the most complex high speed separating units, we can design, reconstruct and manufacture each, even the most complicated element within the highest dimensional tolerance classes.

Marine Control Services

Marine Diesel Finland

Marine Diesel Finland, part of Wihuri Group is a largest private service provider in Finland for marine engine and propulsion system overhauls and installations. We operate 24/7 both in Finland and globally. We keep the ships running.

MarineShaft

MarineShaft specializes in the repair and manufacturing of rudder and propeller equipment, and we are renowned for our unique cold straightening technique of bent shafts with full class approval. With advanced equipment, technology, and extensive know-how, we are ready to handle any repair, either in our workshop or on-site.

Marlink

At Marlink, we are more than just a company, we are a global team driven by innovation, reliability, and sustainability. With industry-leading certifications and a commitment to excellence, we take pride in our people, responsible business practices, and cutting-edge technology. Discover our story, sustainability efforts, and career opportunities.

Mercy Ships

Through its hospital ships, Mercy Ships provides free, high-quality medical care, healthcare capacity building, and sustainable development to those with the fewest resources. Mercy Ships was founded by Don and Deyon Stephens in 1978 and has since worked in more than 55 developing countries, contributing over 17 billion Swedish kronor in healthcare and development aid and treating more than 2.8 million people. The crew on the ships consists of approximately 3,000 volunteers per year from more than 60 countries. They are surgeons, dentists, nurses, healthcare educators, teachers, chefs, sailors, engineers, and agricultural experts who donate their time and expertise. With offices in 16 countries and an African center, Mercy Ships strives to make a difference for individuals and assist nations.

Merenkulun HarjoitteluMylly

Merenkulun HarjoitteluMylly acts as a coordinator for onboard training (OBT) placements on ships. There are eight maritime institutions in Finland, and OBT is an essential part of education in this field. Thus, HarjoitteluMylly is a link between the academies and shipping companies.

Meriaura

Meriturva

Meriturva Maritime Safety Training Centre aims at improving safety at sea by offering a vast selection of fire and survival training both for professional and amateur seafarers. Meriturva consists of two units, fire training unit in Upinniemi Kirkkonummi and survival training unit in Lohja.

Millog Marine & Power

Millog Marine & Power is specializing in comprehensive maintenance, repair, and lifecycle services for marine technology, engines, and backup power units. We serve the maritime industry, energy and industrial sectors, and government authorities.

Navigate

Navigate brings together shipowners, shipyards, technology and service providers, ports, port operators, logistics companies, authorities, and emerging talents, creating a unique platform for the Nordic maritime ecosystem. Over two days, the event features a high-quality conference, alongside a dynamic trade fair. The evening networking party fosters high-level connections between speakers, exhibitors, and industry leaders, enabling meaningful dialogue and collaboration.

Nordic Marine Solutions

As a company with long history going back almost a century, Nordic Marine Solutions has established itself as a market leader within the independent inspection and marine surveying industry in Norway. We have a solid team of more than 40 surveyors and industry experts, strategically located around the Norwegian coast, and maintain a wide network of partners all over Scandinavia and Europe.

Prima Shipping

Promarine

Promarine specializes in advanced communication solutions for the maritime industry. We offer innovative, high-performance antennas and systems for 4G, 5G, VHF, TETRA, MF/HF, anti-jamming and anti-spoofing GNSS, and interference protection (combiners, galvanic isolators). Trusted by naval authorities and marine professionals globally, our products ensure reliable connectivity at sea. Get connected!

RLT Marine

RLT Marine are a marine lighting specialist, dedicated to lighting the seas with breakthrough products, and support that doesn't wait. Working with shipping companies worldwide, we deliver the most efficient LED lighting solutions on the market - reducing energy use and costs while helping shipowners decarbonise fleets and achieve sustainability goals through unmatched technology and support.

RM Propulsion

We are a Dutch company specialised in Stern tube seals /Thruster spares & Propulsion services. We offer technical advise, repair, seal bonding and dry dock /afloat services. Our Stern tube seals are Class approved and compatible with all mayor makers.

ROG Ship Repair

ROG Ship Repair is a repair yard in Waalhaven Rotterdam with own quayside, storage, and workshop. We offer afloat repairs and unique solutions to save down time and repair costs. The teams of specialists are 24/7 available for any repair requests, in the yard and as riding squad. Whether it is scrubber repairs, cranes, winches, stainless steel, hydraulics, engine repair, spares supply or electrical repairs. ROG, your partner for dockside and on-site services.

Roxtec

Roxtec is a global expert in sealing solutions for the marine industry, providing tested and certified systems for cable and pipe penetrations. Its solutions protect vessels against fire, gas and water ingress and other risks, supporting safety, operational reliability and long-term performance across a wide range of marine applications worldwide.

Safety & Navigationsgruppen

Founded in 2009, Safety & Navigationsgruppen is Sweden's largest maritime training provider. Approved by the Swedish Transport Agency, we offer STCW Manila courses and navigation training. Based in Frihamnen, Stockholm, our modern facility ensures professional, secure training focused on participant development. We also provide nationwide training on request.

Schmitt Anchors and Chaincables

Schmitt is a global one stop supplier for anchors, chains, and marine equipment. With 7,000+ tons in stock and 24/7 worldwide service, we provide logistics, installation, recycling, rentals, and certified welding; supporting vessels anywhere with reliable products, expertise, and personal service.

Schottel

The SCHOTTEL Group, with its headquarters in Spay/Rhine, is one of the world's leading manufacturers of steerable propulsion systems for ships and offshore applications. Founded in 1921, the company has been developing and manufacturing azimuth propulsion and complete propulsion systems with power ratings of up to 30 MW for vessels of all sizes and types for 75 years. Around 100 sales and service locations worldwide ensure customer proximity.

Seafaring Employment Service

We serve maritime job seekers living in Finland and maritime employers operating in Finland. The Seafaring Employment Service helps with acquiring and renewing all kinds of maritime certificates of competency and proficiency. Our service is nationwide.

Septor

Technical trading. Your reliable partner for all equipment and spare parts.

Ship Safety Group

Ship Safety Group is comprised of two specialised entities: LSA-Service GmbH and FFE-Service GmbH. We are a dedicated service provider for inspections of life-saving appliances (LSA) and firefighting equipment (FFE). Unlike agencies or subcontractors, we operate with our own team of 24 certified technicians and offer lump-sum pricing including travel costs.

Sjömanspensionskassan

Sjömanspensionskassan (SPK) är den pensionsförsäkrare, som ansvarar för sjöfararnas lagstadgade pensionsskydd. Sjömanspensionskassan beviljar och betalar ut till sjömän pensioner som grundar sig på förvärvsarbete. Sjömanspensionslagen beskriver om pensionskassans verksamhet. Sjömanspensionskassan är grundad år 1956 och är den äldsta privata sektorns pensionsförsäkrare. Finansiering av pensioner i framtiden säkras Sjömanspensionskassan med sin långsiktiga, ansvarsfulla och lukrativa placeringsverksamhet.

Soya IT Marine Solutions

Soya IT Marine Solution design, implement and manage secure onboard IT environments, combining hybrid connectivity, cybersecurity and remote support into one fully managed service. Built on decades of shipping experience, we understand the operational realities of life at sea and deliver solutions that keep vessels connected, secure and efficient. From onboard infrastructure and hybrid connectivity to cybersecurity and remote support, we provide the digital foundation for modern vessel operations.

Synkronex

Synkronex is a Partner for ship owners and shipyards around the world. We provide technical systems, services as well as environmental and green shipping related solutions. We also manufacture window washing units, maintenance platforms and water-tight sills for vessels. We are a distributor for Ultrasonic Anti-fouling systems.

Teknoma

Teknoma is an industrial expert and an import company in the technical sector, representing high-quality products from international companies. With these products and our expert service, we help our customers develop their business to become more competitive in a responsible and sustainable way.

Our products for the marine sector include, for example, C.C.Jensen off-line filters, special seals, fire-resistant hydraulic fluids, etc.

Telemar

Traficom

Trans-Auto

Providing Driveline & Propulsion Solutions in the Marine segment. Trans-Auto are prime suppliers of new units, spares and service of Marine Transmissions, Cardan shafts, Propulsion Solutions & Oil Management systems and associated products for driveline and propulsion systems. We also provide aftermarket and servicing for the Marine Industry for our product segment.

Van Ameyde Marine

Van Ameyde Marine is the leading global marine surveying network with a growing number of in-house marine specialists. We offer our clients global representation with independent and objective consultancy and surveying services on 24/7 basis. In Finland the company was previously known by the name Krogius, which is one of the oldest companies in the transportation field in Finland. Captain Lars Krogius established the company in Helsinki in the 1872.

Vibratec Akustikprodukter

Vibratec is one of Scandinavia's leading suppliers of noise, shock and vibration solutions. Our ambition is to become the preferred choice for customers who need solutions to noise, vibration and shock problems. Vibratec produce and store many products for damping and isolation of vibration, shock and noise over a wide range of applications.

Vikingline

VTE-Filter

VTE is one of the world's leading experts for spare parts, maintenance and repair of filters around filtration and oily water separation in shipping.

Wallenius Marine

Wallenius Marine is a Swedish maritime company with more than 90 years of experience in innovative ship design, newbuilding and ship management. We develop pioneering solutions for efficient vessel operations and low-emission shipping, designing and tailoring vessels to meet each client's unique operational and commercial needs.

Wärtsilä

Wärtsilä is a global leader in smart technologies and lifecycle solutions for marine and energy markets. Headquartered in Helsinki, it drives decarbonization through innovative engines, energy storage, and digital solutions. Operating in over 70 countries with 18,000+ employees, Wärtsilä focuses on sustainability, efficiency, and enabling a 100% renewable energy future.

Ålands landskapsregering

På Åland finns sammanlagt drygt 680 kilometer väg som ägs av Ålands landskapsregering. Linfärjor är en förlängning av vägarna som binder ihop Åland på sex olika rutter. Längs fyra huvudlinjer och tre mindre linjer går det frigående färjor. Landskapsregeringen sköter drift och underhåll av bland annat vägar, broar, hamnar och färjor. Vi sköter även om planering, projektering och upphandling när det finns behov av till exempel nya vägar och broar eller personal till färjorna.

Ålands Sjöfart

Ålands Sjöfart is a leading Nordic maritime publication covering shipping, shipbuilding, technology, energy, logistics, and international trade. Based in the Åland Islands, we report on developments across the Baltic Sea and beyond through news, features, interviews, and analysis. We tell the stories of the people, companies, and innovations shaping the future of maritime industries.
